

Boston, MA and Coral Gables, FL (September 23rd, 2020), VOIP America, Cloud Communication and Collaboration Distributor and Vodia Networks announce a strategic partnership in the Latin American market. Resellers and MSPs in the region can now rely on VOIP America to meet their demands. This incredible partnership strengthens Vodia's presence in Central and South America, including hardware, software, support and certification training.

Vodia is a SIP PBX software (open standard) compatible with Microsoft Teams and that can work as a single instance or as a multi-instance white label solution for small telecommunications operators, without the need for initial investment and with a business model based 100% on channel distribution.

Kyle Asbury, Director of Sales & Marketing at Vodia Networks: "We are extremely excited about our partnership with VOIP America for the LATAM market. Working with such a professional and diverse team puts us in a great position to expand our market share in LATAM, where local support is paramount."

The VOIP America Team: "We are thrilled to join forces with Vodia. Let's provide LATAM with some of the best PBX solutions the market has to offer!"

About Vodia Networks

Vodia has been a trendsetter in the Voice over Internet Protocol (VoIP) industry for over a decade. Since 2006, Vodia has led the VoIP world in innovation and forward-thinking development, particularly with its early adoption of a multi-tenancy platform for its customers. They were the first with this offering and are still one of the very few that can deliver it. Today, Vodia develops and provides leading-edge software for Unified Cloud Communications which are trending significantly on a global scale. Their array of products and services - Vodia IO, Vodia IOP, and Vodia Single Tenant or Hosted PBX Software - position Vodia uniquely in that they can provide solutions for practically every type of business communications need.

Additionally, their offerings are compatible with an unprecedented number of technologies including hard phones, softphones, API's for numerous third-party SW and CRM systems.

Vodia Networks maintains a global presence with offices in four countries. Localized information is available in Germany, France, Australia, Hong Kong and South Africa.

Vodia Phone System is an award-winning software-based office phone system that replaces traditional proprietary hardware PBX. It has been developed specifically for Microsoft Windows/Linux and the SMB market – making it easy to install and manage. Being based on the open SIP standard, the Vodia Phone system works with any SIP-based VOIP provider, VOIP gateway or phone. The product integrates easily with most business networks because it runs on Windows and Linux. The Vodia PBX comes with easy-to-use, built-in customizable templates for resellers looking to add extra value and visibility to their offerings. Options like these make Vodia a great choice for those resellers who are looking for a pain-free administrative experience while increasing the potential for larger revenue streams.
